

## Volunteers Invited for a Research Study

We are looking for volunteers to participate in a research study to better understand the brain areas involved in speech production.

We are recruiting adults who stutter and fluent speaking adults. Participants will come in for one visit that lasts approximately two hours. Participants will be compensated \$20 per hour that they participate in the study. The study will last approximately 2 hours and 30 minutes. The maximum amount of compensation is \$60 for the entire study.

### Eligibility Requirements

- Age 18 years or older
- Proficient in English
- Either a typically fluent speaker or a person who stutters
- No history of speech or language deficits (besides stuttering)
- Right handed
- Good or corrected hearing
- No surgically implanted metal in the body (example; cochlear implants, aneurysm clips, brain electrodes, pace-makers)

To be eligible for the study you must meet the eligibility requirements listed above.

The study will be conducted at the Mind Research Network on the UNM North campus.

If you are interested in participating please contact Dr. Rick Arenas. [rickarenas@unm.edu](mailto:rickarenas@unm.edu) or call 505-277-7003
