

POSTDOC *OPEN*

We are recruiting a postdoctoral fellow for a research lab focusing on developing culturally- and linguistically-specific aphasia interventions, especially for Hispanics with aphasia.

Postdoctoral fellows must have a PhD in communication sciences and disorders or a related field. Applicants must have completed a doctoral degree before beginning to work at UNM. The ideal initial date is January 2025 or soon after.

During the two-year fellowship, postdocs will work on developing new skills related to adapting aphasia treatments for Hispanics, and they will receive mentorship in neurological disorders research from professors at the SHS department. They will also continue their research agenda, write first-author scholarly papers, and work on grant applications.
